

Drywall and Thin Coat Beads

Galvanised beads for internal thin-coat plaster application.

Locusrite Plasterboard Edge Bead

Description and Application

Available in 3.0m lengths in galvanised material only.

Plasterboard Edge Bead is used to reinforce plasterboard edges by enclosing them in a protective steel enclosure.

It is reversible therefore can be used with thin coat plaster or drylining paper tape.

Available in three sizes for varying thickness of plasterboard depth - 9.5, 12.5 and 15mm.

Plasterboard Edge Bead is available in boxes of 50 lengths per carton.

Code	Material	Length (m)	Size (mm)
GEB9530	Galvanised Steel	3.0	9.5
GEB12530	Galvanised Steel	3.0	12.5
GEB1530	Galvanised Steel	3.0	15
