

Drylining Tapes

A Range of professional internal plastering joint tapes.

Premier Bead Corner Tape

Description

Locusrite Premier Bead Corner Tape is made by bonding two corrosion resistant metal strips to paper jointing tape. It is very safe to use as there are no sharp edges compared to conventional beads.

Application

Locusrite Premier Bead Corner Tape is designed for finishing inside and outside drywall corners and is also suitable for construction repair work. The flexible steel backing fits any angle where traditional beading cannot be used and can be easily cut to any length for minimum wastage. It is applied by using standard jointing compound. No nails or special tools are required.

Locusrite Premier Bead Corner Tape is available in boxes of 10, with 30 boxes per pallet.

Code	Description	Width (mm)	Length (m)
