

PVC-U Beads

An alternative range of impact resistant drylining & wet plaster beads for internal or external use.

PVC Plaster Beads are designed for use externally where galvanised beads cannot be used or where they are preferred to stainless steel. They are also used internally in high moisture content areas or where pro-longed drying out periods may be necessary.

Other benefits include:

- Simple installation (with plaster dabs or stainless steel fixings)
- No sharp edges, and safe to handle
- Easy to cut (by use of tin snips or fine tooth saw)
- Non corrosive.

PVC Bead is supplied as standard in white, although many colours are available upon request by supplying us with the relevant 'RAL' reference code.

PVC-U Edge Bead

Description and Application

PVC-U Edge Stop Bead is used to reinforce plasterboard edges by enclosing them in a protective enclosure.

It is reversible therefore can be used with thin coat plaster or dry lining paper tape.

Available in 12.5 or 15mm thickness for relevant plasterboard size.

PVC-U Edge Bead is available in 2.5m lengths with 50 lengths per carton.

Code	Description	Length (m)	Size (mm)
TLP125EB	PVC-U Edge Bead	2.5	12.5
TLP15EB	PVC-U Edge Bead	2.5	15

All PVC Beads are available in alternative colours, namely; black, grey, ivory, terracotta and brown as shown here.
