

PVC-U Beads

An alternative range of impact resistant drylining & wet plaster beads for internal or external use.

PVC Plaster Beads are designed for use externally where galvanised beads cannot be used or where they are preferred to stainless steel. They are also used internally in high moisture content areas or where pro-longed drying out periods may be necessary.

Other benefits include:

- Simple installation (with plaster dabs or stainless steel fixings)
- No sharp edges, and safe to handle
- Easy to cut (by use of tin snips or fine tooth saw)
- Non corrosive.

PVC Bead is supplied as standard in white, although many colours are available upon request by supplying us with the relevant 'RAL' reference code.

PVC-U Render Stop Bead (bellcast)

Description and Application

PVC-U Render Stop Bead is predominantly used to form a neat bell shaped edge at the bottom of an external render finish, thus protecting the edge and acting as a run-off for when rainfall occurs.

Different sizes available for various render thickness.

PVC-U Render Stop Bead is available in 2.5m lengths with 50 lengths per carton.

Code	Description	Length (m)	Size (mm)
TLPERS612	PVC-U Render Stop Bead	2.5	6 / 12
TLPERS1015	PVC-U Render Stop Bead	2.5	10 / 15
TLPERS1222	PVC-U Render Stop Bead	2.5	12 / 22

All PVC Beads are available in alternative colours, namely; black, grey, ivory, terracotta and brown as shown here.
